Intro

Software engineer, ultramarathoner, full stack developer, mother, wife and dog mom. I love learning, facing challenges, traveling, and meeting new people.

1996 Tunis | 2001 France | 2006 Saudi Arabia | 2010 Singapore

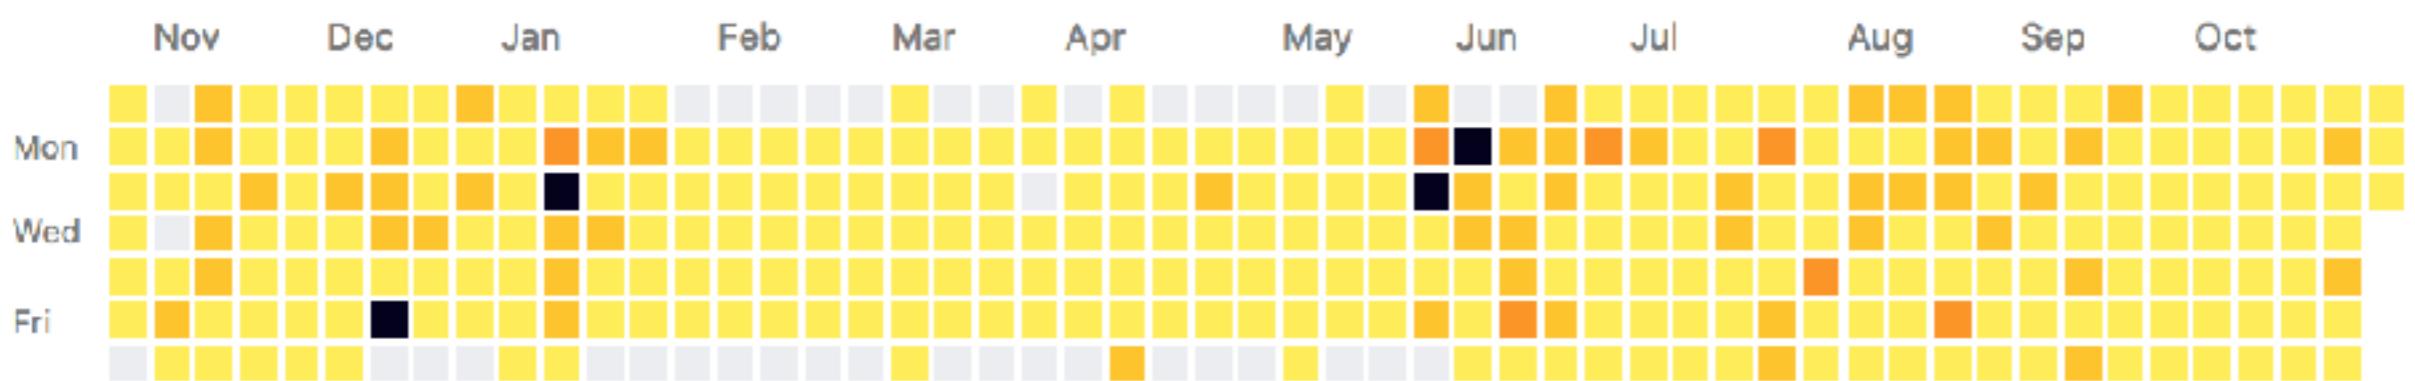

2011 South Korea | Research Scientist, Data and Machine Learning at Samsung CNS and Full Stack Software Engineer

2016 - Present London, UK working as a Software Engineer for a FinTech company.

Technology and computers have been in my life since I was a kid and I have always loved anything related with arts or crafts. I started to code and design at a very young age. Most of my skills and knowledge are self-taught.

NBA Highlights

A React web application where NBA highlights are fetched from a json file

To see the project:

- Clone/download it
- Use `npm install`
- Use `json-server --watch db.json --port 3001`

This application includes examples of major features of React including:

- ES6 syntax
- Templating string
- Destructuring assignment
- fetch API
- React Router
- Component-based architecture
- CSS Partials/Imports
- React Slider on homepage masthead
- React CSS Transitions
- Validations message for subscription emails
- Save data to DB
- Poll to choose best teams

Features

- A user can see NBA highlights
- A user can see a list of NBA teams
- A user can search for his/her favorite team
- A user can see a team profile
- Validation message for subscription emails

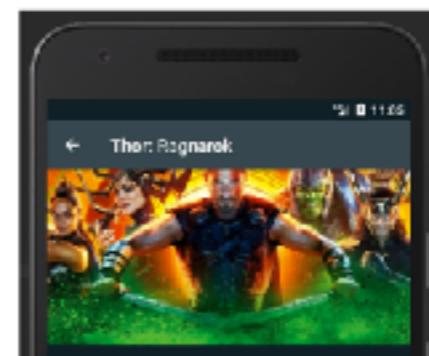

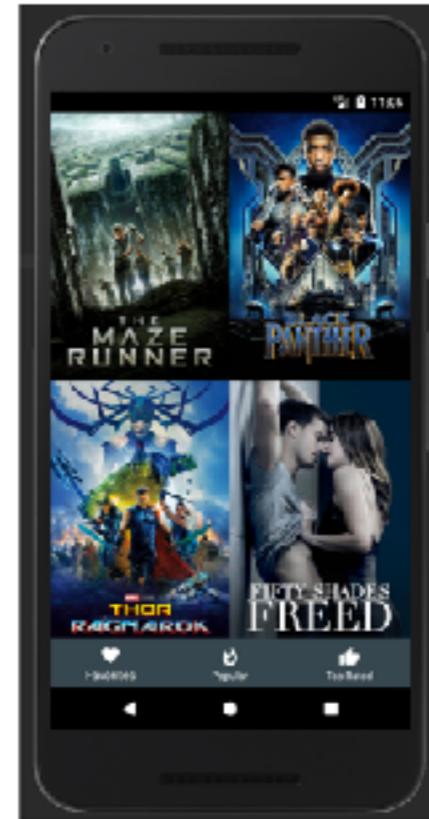

MovieApp | Part Two

today A vulnerabilities 0

An app that allows users to discover popular and top rated movies.

Features

- On MainActivity, movies are displayed in a grid layout
- On MainActivity, the user can filter by popular, top rated or favorites

- On DetailActivity, the title, poster, release date, rating and synopsis are visible
- On DetailActivity, the trailers and reviews are visible
- On DetailActivity, the user can favorite a movie

About

#GetSecure, #BeSecure & #StaySecure

Lead Security Engineer with strong fundamentals in programming, constantly pursuing my passion for learning new languages, frameworks, architecture designs, cloud computing, mobile development and techniques to become a more well-rounded Software Engineer.

Currently based in London, and working for Photobox Group Security. I lived in the Middle-East, North Africa and Asia. My journey from International Business Consultant to Full Stack Engineer has been captured here. <https://medium.com/worldremit/sonyas-journey-international-business-consultant-to-full-stack-dev-9254588be2e0>

Technology and computer have always been an important part of my life. I loved anything related with arts or pixels and started coding at a very young age. Most of my skills and knowledge are self-taught. I'm curious and enjoy works that challenge me to learn something new and stretch me in a different direction. I am keeping an eye on the latest trends over new technologies, software development, programming languages, cybersecurity, web application, mobile application, cloud computing, VR/AR, IoT, video games, eSport, blockchain and quantum computing.

I'm also a tech advocate and public speaker in the UK tech scene. I've given several talks at Women Who Code, CODE:COED, PyLadies, BlockchainLive 2018, React London, Tech Woman London, Tech(k)nowdays, Google Udacity, Flatiron School London, Out In Tech, DevSecOps, DJUGL, OWASP WIA London, Codebar, DevOps Exchange London, ReactJS Girls, Time To React, JSMonthly London, Front End Engineers London, TrendingJS, BlackHat 2019, TechSauce, Ladies of London Hacking Society, Women Driven Development.

Your profile and a potential new opportunity...
Hi Sonya,
I wanted to get in touch about an exciting new opportunity, with one of Europe's top start-ups (based in London), who are working on one of the most exciting projects anyone in tech could be involved with right now - i.e. building the bank of the future ;)
We're looking for talented front-end and back-end engineers with any programming background who are keen to work with a cutting edge tech stack including Go, React, Kubernetes, Docker and Cassandra.
If you're keen to be a part of an open, inclusive and collaborative team, involved in building a truly disruptive product that is used and by hundreds of thousands (soon to be millions!) of people literally every day, let's have a chat! If you could send over your number and a few times that could work for you to speak, we can discuss in more detail next week.
Have a great weekend!
Thanks,
Kiri
