THE JOURNEY CONTINUES IN SOUTH KOREA

MIXING CONSULTANCY WITH TECH

LOOKING FOR A NEW CHALLENGE

2014

Codecademy | Dash | Khan Academy

A screenshot of the Codecademy Dash interface. It features two main project sections: 'PROJECT 1: BUILD A PERSONAL WEBSITE' and 'PROJECT 2: BUILD A RESPONSIVE BLOG THEME'. Each project has a list of steps and a preview image. To the right, there are sections for 'ANNOUNCEMENTS', 'LEARN TO MAKE THEMES', 'CODE WITH FRIENDS', and 'SKILLS'. There are also social media links for Facebook, Twitter, and LinkedIn.

Intro

Software engineer, attorney-at-law, marketing &
PR specialist, author of books and articles and always learning. Facing challenges.

I'm Sonya Moisset

I'm a full-time founder who handles the Marketing, Product and Sales and always learning. Facing challenges.
1996, Toulouse | 2013 France | 2016, Seoul, South Korea | 2018, Singapore

2017, Seoul, Korea. Based in Seoul for 6 months. I was and I am now a self-taught Business, Product, Law and Full Stack
Software Engineer.

2016 - 18, Based in London. I am working as a Software Engineer for a FinTech company.

Technology and computer have been in my life since I was a kid and I have always loved anything related with arts
or plastic. I started to code and design at a very young age. Most of my skills and knowledge are self-taught.

BRAND YOURSELF | THE IMPORTANCE OF GITHUB

The screenshot shows Sonya Moisset's GitHub profile. At the top, there's a black and white photo of her sitting at a desk with a laptop. Below the photo, her name "Sonya Moisset" and handle "@SonyaMoisset" are displayed. A "Edit profile" button is visible. To the right, a navigation bar includes "Overview" (which is selected), "Repositories 243", "Projects 0", "Packages 0", "Stars 1", "Followers 447", and "Following 0".

The "Pinned" section contains four repository cards:

- VendingMachine_iOS**: iOS | Vending Machine. Swift, ★ 1, 1 commit.
- FunFact_KOTLIN**: Kotlin | Fun Fact Generator. Kotlin, ★ 1.
- MovieApp_PhaseTwo_ADVANCED_ANDROID_NANODEGREE**: Second Project for the Android Developer Nanodegree Program | Part II. Java, ★ 2.
- SaaSApplRUBY-ON-RAILS**: CI/CD CRUD Rails SaaS App Hosted on Heroku. Ruby, ★ 1.

Below the pinned section is a heatmap titled "1,301 contributions in the last year" showing activity from March 2019 to February 2020. Contribution settings are shown as a dropdown menu. The years 2015 through 2019 are listed vertically on the right.

The "Activity overview" section shows she contributed to repositories like "PrideInLondon/pride-london-web", "SonyaMoisset/TOH_ANGULAR7", and "SonyaMoisset/Blog_PYTHON", and made 5 other repositories. It also displays a pie chart of her activity distribution: 20% Code review, 60% Commits, 10% Issues, and 10% Pull requests.

View README.md

NBA Highlights

A React web application where NBA highlights are fetched from a json file

To see the project:

- Clone/download it
- Use npx start
- Use json-server --watch db.json --port 3001

This application includes examples of major features of React including:

- ES6 syntax
- Template string
- Destructuring assignment
- fetch API
- Router
- Component-based architecture
- CSS Modules/Imports
- Reset Slider on homepage masthead
- React CSS Transitions
- Validation message for subscription emails
- Save data to DB
- Pol to choose best teams

Features

- A user can see NBA highlights
- A user can see a list of NBA teams
- A user can search for his/her favorite team
- A user can see a team profile
- Validation message for subscription emails

View README.md

MovieApp | Part Two

today 4 vulnerabilities 0

An app that allows users to discover popular and top rated movies.

Features

- On MainActivity, movies are displayed in a grid layout
- On MainActivity, the user can filter by popular, top rated or favorites

BRAND YOURSELF | BE CONSISTENT AND PROFESSIONAL

Sonya Moisset

Senior Security Engineer | Full Stack Software Engineer | Tech Advocate

London, Greater London, United Kingdom

Add profile section More...

Senior full stack software engineer with strong fundamentals in programming, constantly pursuing my passion for learning programming languages (Python, Java, C#, PHP), frameworks (React, Laravel, Django), architecture designs (micro services, cloud-based solutions), mobile development and techniques in order to become a better well-rounded software engineer.

Lived in the Middle-East, North Africa and Asia most of my life, I've always been looking for new challenges when I was working as a business consultant for 12+ years. In 2011, I've moved to Seoul, South Korea, learnt Korean, and settled in Seoul for more than 5 years. I am currently based in London, UK since 2016 and work as a security engineer for a FinTech.

Technology and computers have always been part of my life, I loved anything related with arts or pixels, so I started to code and design at a very young age. Most of my skills and knowledge are self-taught, and over the last 20 years, I've been exploring many different programming languages, web/mobile development and cybersecurity.

I'm curious and enjoy works that challenge me to learn something new and stretch in a different direction. I am constantly keeping an eye on the latest trends over new technologies, software development, programming languages, cybersecurity, web application, mobile application, VR/AR, IoT, video games, eSport, and blockchain.

I'm also a tech advocate and tech speaker in the UK tech scene. I've given several tech talks on software programming and cybersecurity at Women Who Code, CODE:COED, PyLadies, BlockchainLive 2018, React London, Tech Women London, Tech(k)nowday, Google Udacity, Flatiron School London, Out in Tech. I regularly attend meet ups, events and conferences in London.

Your profile and a potential new opportunity...

Hi Sonya,

I wanted to get in touch about an exciting new opportunity, with one of Europe's top start-ups (based in London), who are working on one of the most exciting projects anyone in tech could be involved with right now - i.e. building the bank of the future ;)

We're looking for talented front-end and back-end engineers with any programming background who are keen to work with a cutting edge tech stack including Go, React, Kubernetes, Docker and Cassandra.

If you're keen to be a part of an open, inclusive and collaborative team, involved in building a truly disruptive product that is used and by hundreds of thousands (soon to be millions!) of people literally every day, let's have a chat! If you could send over your number and a few times that could work for you to speak, we can discuss in more detail next week.

Have a great weekend!

Thanks,

Kiri

Two-factor authentication

Requiring an additional authentication method adds another level of security for your organization.

Require two-factor authentication for everyone in the Pride in London organization.

Members, billing managers, and outside collaborators who do not have two-factor authentication enabled for their personal account will be removed from the organization and will receive an email notifying them about the change.

Member repository permissions

Base permissions

Base permissions to the organization's repositories apply to all members and excludes outside collaborators. Since organization members can have permissions from multiple sources, members and collaborators who have been granted a higher level of access than the base permissions will retain their higher permission privileges.

WHAT IS CYBERSECURITY

AND WHY IS IT IMPORTANT?

CYBERSECURITY IS THE TECHNIQUES OF
PROTECTING COMPUTERS,
NETWORKS,
PROGRAMS AND
DATA
FROM **UNAUTHORISED ACCESS** OR **ATTACKS**
THAT ARE AIMED FOR **EXPLOITATION**

OCT 2016.

A SERIES OF **DDOS ATTACKS** WERE LAUNCHED AGAINST **DNS SERVERS**, WHICH CAUSED MAJOR WEB SERVICES TO STOP WORKING

No server is currently available to service your request.

Sorry about that. Please try refreshing and contact us if the problem persists.

The search engine for Power Plants

Shodan is the world's first search engine for Internet-connected devices.

[Create a Free Account](#)[Getting Started](#)

Explore the Internet of Things

Use Shodan to discover which of your devices are connected to the Internet, where they are located and who is using them.

Monitor Network Security

Keep track of all the computers on your network that are directly accessible from the Internet. Shodan lets you understand your digital footprint.

See the Big Picture

Websites are just one part of the Internet. There are power plants, Smart TVs, refrigerators and much more that can be found with Shodan!

Get a Competitive Advantage

Who is using your product? Where are they located? Use Shodan to perform empirical market intelligence.

Shodan is used around the world by researchers, security professionals, large enterprises, CERTs and everybody in between.

Analyze the Internet in Seconds

Shodan has servers located around the world that crawl the Internet 24/7 to provide the latest Internet Intelligence. Who buys Smart TVs? Which countries are building the most wind farms? What companies are affected by Heartbleed? Shodan provides the tools to answer questions at the Internet-scale.

Ooops, your files have been encrypted!

English

▼

not so enough time.

You can decrypt some of your files for free. Try now by clicking <Decrypt>.

But if you want to decrypt all your files, you need to pay.

You only have 3 days to submit the payment. After that the price will be doubled.

Also, if you don't pay in 7 days, you won't be able to recover your files forever.

We will have free events for users who are so poor that they couldn't pay in 6 months.

Payment will be raised on

1/4/1970 00:00:00

Time Left

00:00:00:00

Your files will be lost on

1/8/1970 00:00:00

Time Left

00:00:00:00

[About bitcoin](#)

[How to buy bitcoins?](#)

[Contact Us](#)

How Do I Pay?

Payment is accepted in Bitcoin only. For more information, click <About bitcoin>.

Please check the current price of Bitcoin and buy some bitcoins. For more information, click <How to buy bitcoins>.

And send the correct amount to the address specified in this window.

After your payment, click <Check Payment>. Best time to check: 9:00am - 11:00am GMT from Monday to Friday.

Once the payment is checked, you can start decrypting your files immediately.

Contact

If you need our assistance, send a message by clicking <Contact Us>.

We strongly recommend you to not remove this software, and disable your anti-virus for a while, until you pay and the payment gets processed. If your anti-virus gets updated and removes this software automatically, it will not be able to recover your files even if you pay!

Send \$600 worth of bitcoin to this address:

re: "██████████"

Inbox x

Dirk Saunders <yxpnmjarrettlwq@outlook.com>

12:07 PM (8 minutes ago)

to me ▾

I know, ████████, is your pass word. you may not know me and you are most likely thinking why you're getting this e-mail, correct?

Well, I installed a malware on the adult video clips (pornography) and you know what, you visited this web site to have fun (you know what I mean). When you were watching video clips, your browser started operating as a Rdp (Remote desktop) that has a key logger which gave me accessibility to your screen and also cam. Just after that, my software program gathered every one of your contacts from messenger, social networks, as well as email.

What exactly did I do?

I created a double-screen video. First part displays the video you were watching (you've got a good taste lol), and 2nd part displays the recording of your web cam.

Exactly what should you do?

Well, I believe, \$1200 is a fair price for our little secret. You'll make the payment through Bitcoin (if you don't know this, search "how to buy bitcoin" in google).

BTC ADDRESS: 1JC99fcQMVR4iHdmf3GbHLGHMkPpyFjBu7

(It's CASE sensitive, so copy and paste it carefully)

Note:

You have one day to make the payment. (I've a specific pixel in this message, and right now I know that you've read this e mail). If I do not receive the Bitcoins, I will certainly send out your video recording to all of your contacts including friends and family, colleagues, and so forth. nonetheless, if I receive the payment, I'll destroy the video immediately. If you need proof, reply with "yes!" and I definitely will send your video recording to your 14 friends. It is a non-negotiable one time offer, thus don't ruin my time & yours by responding to this e-mail.

A close-up photograph of a woman's face. She has dark hair and is wearing red lipstick. Her right index finger is held vertically to her lips, creating a 'shh' or secret gesture. She is wearing a gold ring on her middle finger. The lighting is soft and focused on her face.

[REDACTED] I know everything about you. I even know that you ordered some .. lets call them 'male assistance products' online on 12/11/2018 using your account at Bank Of America, N.a., routing# 121000358 account# [REDACTED] for \$75 for mailing to CA [REDACTED] I even know about the other 3 other similar orders. Do your friends and family know you have been buying these aids? Do the partners you find on AMadison know you have been using 'chemical help' to have a good time? Very soon they could find it all out. Social media is a great way of spreading an embarrassing message. Of course I will use email also. Your devices have been compromised. I know everything. **The attached pdf says what you need to do to stop this. Because of filters and keyword this pdf has a password to stop a mail server reading it, the password is 2227. I am giving you very little time.** If you do not act very fast, your full AMadison profile and proof of it will be shared with friends, family, and online over social media - and of course your internet orders..... The end of [REDACTED] (415) [REDACTED] One of the addresses I have for you : CA [REDACTED] Date of birth (claimed on AM site) : [REDACTED] First signed up for A.Madison : July 28, 2011, from [REDACTED] - an IP address registered in or near [REDACTED] Username on A.Madison [REDACTED] Security answer on A.Madison : [REDACTED]

Of all the private messages you sent to members, the reply you sent on Sunday July 31, 2011 was the best. Perv!
Send 0.1188 bit.coin to the bit.coin address 1NesEJSxmwJcmUwfgpv7a55ycVVVXLbsir before January 21 or I will send all of this and much more to everyone who knows you on January 21.

There is only one way to protect yourself - pay now. A search engine will show you how to get and send bit.coin. You can search google or bing for "Buy bit.coin".

bit.coin addresses are case sensitive! aBcd1 is not the same as abcd1

At the top is a QR code if you do not want to type the address and you have a phone or other bit.coin wallet which can read them. The QR code is optional. Only you have this address so I can know when you paid. You can tell from the popular "I have a video of you" emails that they all share the same bit.coin address so there is no video and no way of knowing who paid --They are bluffing and have nothing. I have given you a unique payment address - because I am going to expose those who did not pay so I need to know who did pay. Make no mistake, this is personal to you and you will be exposed. I have more than enough proofs.I never bluff.

Do not pay less than 0.1188 BIT COIN, YOU WILL BE WASTING YOUR MONEY.

I will not wait, everyone who knows you will hear about how you have been cheating for years. You will not find me, I have protected myself with multiple VPNs and used a cybercafe. This email address is a temporary address which will be abandoned tomorrow. The only thing you can do is pay in full on time. If you miss the deadline, the next day I will send out emails that will totally destroy you. You can stop this by paying.

Unlike some people I always keep my promises. I will expose you and tell them all if you have not paid on time. I have done it before to others and I will do it again.

Bitcoin Address Lookup

Enter BTC address, keyword, name, screen name, etc.

WHAT IS WEB APPLICATION SECURITY

“Web application security is a **branch of Information Security** that deals specifically with security of websites, web applications and web services.”

-WIKIPEDIA

WHAT IS OWASP?

Open Web Application Security Project

Community dedicated to enabling organisations
to conceive, develop, acquire, operate and
maintain applications that can be trusted

www.owasp.org

Who is the OWASP Foundation?

The Open Web Application Security Project (OWASP) is a nonprofit foundation that works to improve the security of software. Through community-led open source software projects, hundreds of local chapters worldwide, tens of thousands of members, and leading educational and training conferences, the OWASP Foundation is the source for developers and technologists to secure the web.

- Tools and Resources
- Community and Networking
- Education & Training

For nearly two decades corporations, foundations, developers, and volunteers have supported the OWASP Foundation and its work. [Donate](#), [Join](#), or become a [Corporate Member](#) today.

Project Spotlight: Zed Attack Proxy

ZAP is a free, easy to use integrated penetration testing tool which now includes a Heads Up Display. Easily used by security professionals and developers of all skill levels, users can quickly and more easily find security vulnerabilities in their applications. Given the unique and integrated design of the Heads Up Display, developers new to security testing will find ZAP an indispensable tool to build secure software. [Learn more](#) about ZAP.

Featured Chapter: Bay Area

Hosted at some of most iconic technology companies in the world, the Bay Area chapter is one of the Foundation's largest and most active. This month they are hosting a Hacker Day and monthly meetups in San Francisco at Insight Engines and in South Bay at EBay. Usually the agenda includes three provocative and interesting talks, lots of interesting people to meet, and great food. The Bay Area Chapter also participates in planning AppSec California.

WHAT'S NEXT -
SECURITY
CHAMPIONS

Security Champions playbook

Identify teams

- Enumerate products and services
- List teams per each product
- Identify Product manager (responsible for product) and team manager (working directly with developers)
- Write down technologies (programming languages) used by each team

Define the role

- Measure current security state among the teams and define security goals you plan to achieve in mid-term (e.g. by using OWASP SAMM)
- Identify the places where champions could help (such as verifying security reviews, raising issues for risks in existing code, conducting automated scans etc.)
- Write down clearly defined roles, as these will be the primary tasks for newly nominated champions to work on

Nominate champions

- Introduce the idea and role descriptions and get approvals on all levels - both from product and engineering managers, as well as from top management
- Together with team leader identify potentially interested candidates
- Officially nominate them as part of your security meta-team

Comm channels

- Make sure to have an easy way to spread information and get feedback
- While differing from company to company, this usually includes chats (Slack/IRC channel, Yammer group, ...) and separate mailing lists
- Set up periodic sync ups - bi-weekly should be fine to start with

Knowledge base

- Build a solid internal security knowledge base, which would become the main source of inspiration for the champions
- It should include security meta-team page with defined roles, secure development best practices, descriptions of risks and vulnerabilities and any other relevant info
- Pay special attention to clear and easy-to-follow checklists, as it's usually the simplest way to get the things going

Maintain interest

- Develop your ways or choose one of the below to keep in touch and maintain the interest of the champions
- Conduct periodic workshops and encourage participation in security conferences
- Share recent appsec news (e.g. Ezine) via communication channels
- Send internal monthly security newsletters with updates, plans and recognitions for the good work
- Create champions corner with security library, conference calendar, and other interesting materials

KEY TAKEAWAYS

Attends meet ups

Get involved in the Tech community!

Keep learning new things

Soft skills are important!

Be positive

Sharing is caring :)
